

Training Course :

## Building Finishes And Rehabilitation Works

Training Course For One Week In

Egypt, Sharm El Sheikh, Sharm El Sheikh Marriott Resort

Which Be Held As Under Details :

## Abar Solutions Petroleum Consultancy Invite Your Employee To Participate With Us In Special Training Course As Under Details :

Course Name		Building Finishes And Rehabilitation Works			
Code	Period	Language	Start	End	Location
CE 39	5 Days	Bilingual (Arabic & English)	13/08/2017	17/08/2017	Egypt , Sharm El Sheikh , Sharm El Sheikh Marriott Resort
			03/09/2017	07/09/2017	
			08/10/2017	12/10/2017	
			12/11/2017	16/11/2017	
			10/12/2017	14/12/2017	
			14/01/2018	18/01/2018	
			11/02/2018	15/02/2018	
			11/03/2018	15/03/2018	
			15/04/2018	19/04/2018	
			20/05/2018	24/05/2018	
			10/06/2018	14/06/2018	
22/07/2018	26/07/2018				
<b>** The Fees Includes : Lecturer , Training Material , Training Room With One Coffee Break Daily , Certificate Of Attendance In Last Day Training Course **</b>					

### Course Description

- ⇒ Since the introduction of modern design-oriented computer software, the concrete industry has tended to concentrate on the structural design aspects of reinforced concrete and, as a result, the importance of durability has often been over-looked or neglected. Over the last decade, concrete rehabilitation has become recognized to be a "stand alone" discipline requiring very specialist knowledge and expertise.
- ⇒ The latest advances in materials and techniques and the current state-of-the-art for concrete will be presented, together with concerns that require consideration when modern materials are used, particularly for the first time, or when they are used in combination.

- ⇒ In addition, the latest advances in materials and techniques and the current state-of-the-art will be presented for the rehabilitation of concrete structures. Case studies will be used to highlight failures, defects or deterioration that can often be caused by the selection of incorrect materials and rehabilitation techniques.
- ⇒ The many advances in rehabilitation technology that have occurred over recent years will be examined, together with how they can provide considerable benefit to the concrete rehabilitation industry - and ensure that we get it right the second time! The major objective of the conference is to present a thorough review and a comprehensive update of the practical and technological state-of-the-art for concrete, including mix design, materials technology, specification, construction, testing and inspection. The conference has been developed to cover all aspects of designing, specifying and constructing concrete structures for improved durability, so that they can better survive the severe Gulf and Peninsula environment and provide long service life.
- ⇒ The conference will be of special interest to facility and asset owners and their representatives, together with every one who is involved in the design, specification, construction, rehabilitation and maintenance of concrete structures and buildings, including Government Agencies, Specifiers, Architects, Engineers and Consultants, Inspectors and Technicians, as well as the Contracting, Engineering and Maintenance teams.

### Course Objectives

- ⇒ This conference will provide the delegates with the latest information and knowledge of modern materials, techniques and practices for designing, constructing, investigating, rehabilitating, maintaining and monitoring concrete structures and buildings. Delegates will have the opportunity to learn proven methods for success in identifying and avoiding costly problems that could lead to failures.

### Course Content & Outlines

- ⇒ **Module 1:**
- ⇒ **Understanding Concrete & Why it is Vulnerable to Attack**
  - What are the problems?
    - Climate
    - Quality of materials & workmanship
    - Corrosion
    - Chlorides & sulfates
  - What makes concrete durable?
    - Influence of porosity
    - Influence of cracks
  - Designing concrete for durability

- Key considerations
- Material proportions and their influence

⇒ **Module 2:**

⇒ **Constructing, Inspecting & Testing Durable Concrete**

- Dealing with temperature
- Handling & Placement
- Consolidation
- Finishing & Curing
- Quality Control
- Quality Assurance
- Inspection
- Sampling & Field Testing
- Tests on Hardened Concrete

⇒ **Module 3:**

⇒ **The Investigation Process & Rehabilitation Strategy Development**

- Preliminary Studies
- Condition Surveys
- Non-Destructive Testing (NDT)
  - Impact-Echo
  - Ultrasonics
  - Ground Penetrating Radar
  - Impact-Echo
- Cause Analysis
- Repair Failure Case Studies

⇒ **Module 4:**

⇒ **Rehabilitation Strategy Option**

- Removal, replacement and reconstruction
- Reconstruction
- Chloride Removal
- Cathodic Protection (Impressed & Passive)
- Corrosion Inhibition
- Crack Repair Materials & Practices
- Joints, Joints and Jointing Systems
- Rehabilitation Strategy Options

⇒ **Module 5:**

⇒ **Implementing a Rehabilitation Strategy**

- Concrete Repair Materials
  - Material Types
  - Desired Properties
  - Chloride Removal
- Spraying, Troweling and Forming Repairs
- Rehabilitation Case Studies
- ⇒ **Module 6:**
- ⇒ **Building Envelope Repair & Maintenance**
  - Defining the Building Envelope
  - Mechanisms of Deterioration
  - Building Envelope Inspection Procedures
  - Building Investigation Case Studies
- ⇒ **Module 7:**
- ⇒ **Building Envelope Repair & Maintenance**
  - Building Envelope Repair and Maintenance
  - Building Envelope Repair Case Studies
  - Preventative Maintenance Techniques
  - Inspection & Testing
- ⇒ **Module 8:**
- ⇒ **Building Envelope Construction Mistakes & Failures**
  - The Construction Process
  - Causes of Failure
  - Top 10 Construction Mistakes
  - Forensic Investigations
  - Construction Mistake Case Studies
  - Building Failure Case Studies
- ⇒ **Module 9:**
- ⇒ **Building Design Errors & Omissions**
  - The Design and Construction Issues
  - Forensic Investigations
  - Design Error Case Studies
  - Current Trends
  - North American Construction Claims
  - The Real Cost of Poor Design
  - Avoiding Common Design Errors - 10 Essential Steps
